

Adding text alerts to your Cloud account

To add text alerts to your Cloud account:

- When at the home page of your Cloud account click on “Devices”.
- Select the device you want to add text alerts to. At the bottom of the page click on “Change Device Settings”.
- Click on the icon “Email Alerts”.
- Under “Manually add email address to receive alerts” enter the name of the person getting text alerts. Example: Alice Cell or Alice Text. See the “1” with the red arrow in the next page.
- The format used by phone carriers to send a text message through email is on page 4 of this document. Example: If Alice uses Verizon, the format is her 10 digit phone number with the suffix @vtext.com, or 9094963006@vtext.com. See the “2” with the red arrow in the next page.
- Lastly click on the “+” sign to the right of the box. See the “3” with the red arrow in the next page.
- The name will now appear in the list. Check the boxes that you want the person to get texted and then click apply. See page 3 for reference.
