VFC 400 Data Logger Configuration

Note: Control Solutions will pre-configure data loggers sent to Health Departments and VFC providers in Arizona. The box and logger should be labeled Fridge or Freezer. The following instructions are for loggers that are pre-configured.

Configuration changes to your VFC 400 can be easily done with use of “Profiles”
VFC 400 Data Logger Configuration

- Make sure your VFC 400 software is open on your PC
- Plug your Docking Station into the USB port of your PC
- Insert data logger into the Docking Station firmly
VFC 400 Data Logger Configuration

- After you insert the logger into the docking station you should see 2 screens in succession (see below)

When you see “Logger has been re-configured” click OK and then you should be back to the grey screen.
VFC 400 Data Logger Configuration

- In the upper left corner of the software click on “LogTag” then click on “Configure” from the drop down menu.
The top field is the User ID field. Select a name for your data logger. SC VFC suggests using your VFC pin number with the type of cooling unit after that.

Example: 21345RG

Up to 58 Characters long
This slide shows the set-up for a Freezer. The process is the same in that all you need to do is name the logger under User ID.
The data logger is all set-up. To apply the changes we click the next button at the bottom. This will over write data logger settings and put logger into “READY” mode.
VFC 400 Data Logger Configuration

- This should bring you to this screen where we will click on Close. We can now take the data logger out of the Docking Station and it is READY for the next logging session.
VFC 400 Data Logger Configuration

Data Logger Profiles are preset configuration “recipes” that will allow a very quick and easy method of reconfiguring your VFC 400’s

- In the upper left corner of the software click on “LogTag” then click on “Profiles” from the drop down menu
VFC 400 Data Logger Configuration

- Select configuration “profile” from list, then insert VFC 400 into docking station
- Select “Configure Loggers”
  VFC 400 will be reconfigured with new settings
- Check / Edit logger name to complete process.
